

**KIDS for
the BAY**

Environmental education through action

KIDS for the BAY will help make your child's birthday party an unforgettable science adventure! We offer a variety of fun and exciting learning experiences for ages 5-10.

SCIENCE ADVENTURE Birthday Parties

Choose from one of the following themes:

Let's Experiment (ages 5-7)

Party guests will create exploding volcanoes, experiment with endothermic and exothermic reactions and create cool lava lamps to take home. Each guest will also make and take home slimy 'gak' creations. We will finish the party with super exploding rocket poppers!

Exploring Wildlife (ages 8-10)

Discover the life of animals! Dissect owl pellets and re-create the tracks of forest creatures. Kids will take home fish print cards and animal tracks that they have created themselves.

Bay or Creek Discovery Field Trip (ages 5-10)

Meet KIDS for the BAY at a local creek or the Berkeley Marina and have your birthday party outdoors! Both locations offer young environmentalists the opportunity to care for nature, view and hold creatures up close, play fun food chain games and create nature art.

Cost: \$250 per party

Time: 1-1.5 hours

Audience: 5-10 years old, 16 children max

We serve cities within a 30 mile radius of Berkeley. An additional \$30 fee is charged for travel to/from a birthday party location beyond a 20 mile radius of Berkeley.
